

EDITORIAL COMMENT ON THE STATE'S BANNING OF
"FRONTLINE ON HEALTH IN AFRICA".

South Africa has no press freedom!

We are therefore not surprised at the State's banning of newspapers and other publications. We nevertheless wish to express our total disgust at the banning of "Frontline on Health in Africa", produced in Cape Town. Obviously the State wishes to silence all accurate descriptions of the extent of ill health and its causes in South Africa, as well as all criticism of this situation. Through actions such as this the State seeks to maintain the present unjust and unequal system. They cannot possibly succeed!

We would like to thank Cynthia for her help with typing and John for doing the printing.
