NICARAGUA MUST

SURVIVE...

Since the Sandinista victory in 1979 women in Nicaragua have gained access to healthcare, education, employment and the right to an equal say in running the country.

Now all these gains are at risk. The US backed military and economic destabilisation threatens Nicaragua's achievements and development.

Women's liberation in Nicaragua depends on the survival of these achievements.

In response to calls for help War on Want has launched a Women in Nicaragua Container Appeal to send material aid and money for urgent needs and long term self-sufficiency.

Your help is needed today!
