WHO DID

THIS?

We Demand an answer to the following questions

- 1 Was Trevor in his present condition when the police found him? Did he have bruises and cuts over the length of his body? If so, why was he charged with an offence? Why was he not taken directly to hospital? Why were these injuries not discovered on Trevor's five visits by police doctors and two journeys to Homerton hospital whilst in police custody?
- 2 If Trevor was NOT in his present condition when found by the police, how did he receive his injuries whilst in police custody?
- 3 Why, given Trevor's condition, did it take six officers to forcibly take his fingerprints? Why, immediately after this ordeal, did Trevor see three doctors within six hours? What happened?
- 4 Why did the police not inform us they were holding Trevor once they discovered his identity on 3 January 1987?
- 5 Why did prison officers destroy some of Trevor's clothes?
- 6 Why did police invent a brain tumour for Trevor?
- 7 Why have Stoke Newington police suddenly dropped all charges against Trevor?
